SUMMARY

Inspired by the need to empower people find a way to present themselves online I have excellent knowledge in frontend development and client management. Through my projects, I have developed effective working relations with stakeholders and have emphasized my skills in teamwork, effective communication, and critical thinking. Web development is what brought me into the creative field which in a way triggered my business inclined spirit.

SKILLS

- **Technical Skills:** C, Java (Basics), Python (Basics), HTML, CSS, Django, Git (Basics)
- **Certifications:** Elements of AI, Crash Course on Python, Web Development Using Python
- **Soft Skills:** Project Management, Critical Thinking, Effective Communication, Collaboration

PROJECT EXPERIENCE

Malayalam Parser   **Feb 2024 - May 2024**
- Analyze syntactic and semantic structures, addressing the scarcity of annotated datasets in Malayalam for NLP applications, aiding in the creation of high-quality datasets
- Used Django for web development, spaCy for natural language processing, TextBlob for sentiment analysis, GoogleTranslator for language translation, and CSV for data storage and handling.
- Rule based training the model on annotated data to capture Malayalam's linguistic nuances

Alumni Website   **Oct 2023 - Present**
- Design and development of an official web site to a college alumni association with aims of communication, contact, and content sharing among the members
- Utilized HTML, CSS and JavaScript for frontend interfaces and Django for the backend interfaces to have unity across the medium of all devices used

Bank Management System   **Nov 2023 - Dec 2023**
- Deposit, withdrawal, transfer and comprehensive transaction history feature for tracking and reviewing financial activities, Manager dashboard for efficient customer listing, customer detailing, and record creation, with the ability to delete customer accounts for data integrity and compliance
- Implemented Django web framework, integrating Django's built-in user authentication system

Hack Club Website   **Jan 2023 - Feb 2023**
- A dynamic website for a college club, integrating features such as event scheduling, team profiles, and interactive forums to enhance club engagement and communication
- Used HTML, CSS, Bootstrap, and JavaScript to create a user-friendly and responsive web platform

Other Projects: Bharatham '24 Website

EDUCATION

Bachelor of Technology in Computer Science and Engineering   **Nov 2021 - Present**
Rajagiri School of Engineering and Technology

Higher Secondary   **Jun 2019 - Mar 2021**
Christ Vidyanikethan

NOTABLE ACHIEVEMENTS

Secretary at ACM Rajagiri Chapter
Technical Head at Hack Club RSET
